

## ONLINE SUPPLEMENTARY DOCUMENT

### Appendix S1: Search strategies

Search strategies for MEDLINE (through Ovid) presented; strategies were adapted for EMBASE and the Web of Science. Lymphomas of interest: Hodgkin's and Burkitt's. Carcinomas of interest: gastric and nasopharyngeal.

#### Lymphoma search strategy (run 1<sup>st</sup> June 2017)

#	Terms	Hits
1	exp Herpesvirus 4, Human/	22,298
2	(EBV or Epstein-barr virus or Epstein barr Virus or HHV-4 or HHV4).mp. [mp=title, abstract, original title, name of substance word, subject heading word, keyword heading word, protocol supplementary concept word, rare disease supplementary concept word, unique identifier, synonyms]	35,532
3	1 OR 2	38,699
4	exp Risk Factors/	703,159
5	exp Epidemiology/	24,419
6	exp Cross-Sectional Studies/	247,653
7	exp Cohort Studies/	1,693,391
8	exp Case-Control Studies/	877,749
9	exp Clinical Trial/	806,724
10	(epidemiol* or risk factor or cross-sectional or cohort or case control or case-control or intervention study).mp. [mp=title, abstract, original title, name of substance word, subject heading word, keyword heading word, protocol supplementary concept word, rare disease supplementary concept word, unique identifier, synonyms]	1,507,190
11	4 OR 5 OR 6 OR 7 OR 8 OR 9 OR 10	3,642,502
12	exp Lymphoma/	162,050
13	exp Burkitt Lymphoma/	9,943
14	exp Hodgkin Disease/	33,391
15	exp Lymphoma, Non-Hodgkin/	94,494
16	(Burkitt* or Hodgkin* or lymphoepithelioma-like carcinoma* or lymphoma*).mp. [mp=title, abstract, original title, name of substance word, subject heading word, keyword heading word, protocol supplementary concept word, rare disease supplementary concept word, unique identifier, synonyms]	243,875
17	12 OR 13 OR 14 OR 15 OR 16	247,229
18	3 AND 11 AND 17	1,352

Carcinomas search strategy (run 4<sup>th</sup> August 2017)

Nasopharyngeal		
#	Terms	Hits
1	"Herpesvirus 4, Human" [MeSH] OR "EBV" OR "Epstein-Barr Virus" OR "Burkitt Herpesvirus" OR "Human Herpesvirus 4" OR "HHV4"	36,213
2	"Nasopharyngeal Neoplasms" [MeSH] OR "Cancer of Nasopharynx" OR "Nasopharyngeal cancer" OR "Cancer of the Nasopharynx" OR "Nasopharynx Neoplasms" OR "Nasopharyngeal Carcinoma" OR "NPC"	320,098
3	"Risk Factors" [MeSH] OR "Epidemiology" [MeSH] OR "Cross-Sectional Studies" [MeSH] OR "Cohort Studies" [MeSH] OR "Case-Control Studies" [MeSH] OR "Clinical Trial" [MeSH] OR "Epidemiol*" OR "risk factor" OR "cross-sectional" OR "cohort" OR "case control" OR "case-control" OR "intervention study" OR "association" OR "risk" OR "rate" OR "odds"	3,786,202
4	#1 AND #2 AND #3	735

Gastric		
#	Terms	Hits
1	"Herpesvirus 4, Human" [MeSH] OR "EBV" OR "Epstein-Barr Virus" OR "Burkitt Herpesvirus" OR "Human Herpesvirus 4" OR "HHV4"	36,213
2	"Stomach Neoplasms" [MeSH] OR "Cancer of the Stomach" OR "Gastric Cancer" OR "Gastric Neoplasms" OR "Neoplasms, Gastric" OR "Neoplasms, Stomach" OR "Stomach Cancer" OR "Gastric adenocarcinoma" OR "Gastric Carcinoma" OR "Adenocarcinoma of the Stomach"	96,514
3	"Risk Factors" [MeSH] OR "Epidemiology" [MeSH] OR "Cross-Sectional Studies" [MeSH] OR "Cohort Studies" [MeSH] OR "Case-Control Studies" [MeSH] OR "Clinical Trial" [MeSH] OR "Epidemiol*" OR "risk factor" OR "cross-sectional" OR "cohort" OR "case control" OR "case-control" OR "intervention study" OR "association" OR "risk" OR "rate" OR "odds"	3,786,202
4	#1 AND #2 AND #3	185

**Table S2: Quality assessment**

BL- Burkitt's lymphoma, GC- gastric carcinoma, HL- Hodgkin's lymphoma, N- no, N/A- not applicable, NPC- nasopharyngeal carcinoma, U- unknown, Y- yes

Author	Cancer	Is the study design clearly reported?	Is the hypothesis/aim/objective of the study clearly described?	Are the main outcomes to be measured clearly described in the Introduction or Methods section?	Are the characteristics of the patients included in the study clearly described?	Are the distributions of principal confounders in each group of subjects to be compared clearly described?	Are the main findings of the study clearly described?	Does the study provide estimates of the random variability in the data for the main outcomes?	Have the characteristics of patients lost to follow-up been described?	Have actual probability values been reported for the main outcomes except where the probability value is <0.001?	Was there potential for recall bias in the ascertainment of the exposure?	Was there potential for differential or non-differential misclassification of the exposure?	Was there potential for observer bias in ascertainment of the outcome?	Was there potential for differential or non-differential misclassification of the outcome?	If any of the results of the study were based on 'data dredging' was this made clear?	In trials and cohort studies, do the analyses adjust for different lengths of follow-up of patients, or in case-control studies, is the time period between the intervention and outcome the same for cases and controls?	Were the statistical tests used to assess the main outcomes appropriate?	Were the main outcome measures used accurate (valid and reliable)?	Were the patients in different intervention groups (trials and cohort studies) or were the cases and controls (case-control studies) recruited from the same population?	Were study subjects in different intervention groups (trials and cohort studies) or were the cases and controls (case-control studies) recruited over the same period of time?	Was there adequate adjustment for confounding in the analyses of interest?	Were losses of patients to follow-up taken into account?	Are the study results appropriately interpreted e.g. in terms of the strength of the evidence, its application/implications, causality?	Did the study have sufficient power to detect a clinically important effect where the probability value for a difference being due to chance is less than 5%?
