

**Table S1. Variables used in the development of the survey-based women's empowerment index.**

SWPER		
Domain	Variable	Code or unit
<b>Attitude to violence</b>	Beating NOT justified if:	
	1. wife goes out without telling husband	Yes = -1; Don't know=0 <sup>2</sup> ;
	2. wife neglects the children	
	3. wife argues with husband	No=1
	4. wife refuses to have sex with husband	
5. wife burns the food		
<b>Social independence</b>	6. Frequency of reading newspaper or magazine	Not at all=0; <once a week=1; ≥once a week=2
	7. Woman education in completed years of schooling	Years
	8. Education difference: woman minus husband completed years of schooling	Years
	9. Age difference: woman age minus husband age	Years
	10. Age at first cohabitation	Years
<b>Decision making</b>	11. Age of woman at first birth	Years
	Who usually decides on:	
	12. Respondent's health care	Husband or other alone= -1;
	13. Large household purchases	Respondent alone/ jointly with husband or other=1
	14. Visits to family or relatives	

Note: Category "Don't know" was set to missing and imputed as yes or no in the multiple imputation process.

**Figure S1. Comparison of the SWPER score distribution between complete cases<sup>1</sup> and observations with at least one SWPER item imputed using multiple imputation.**

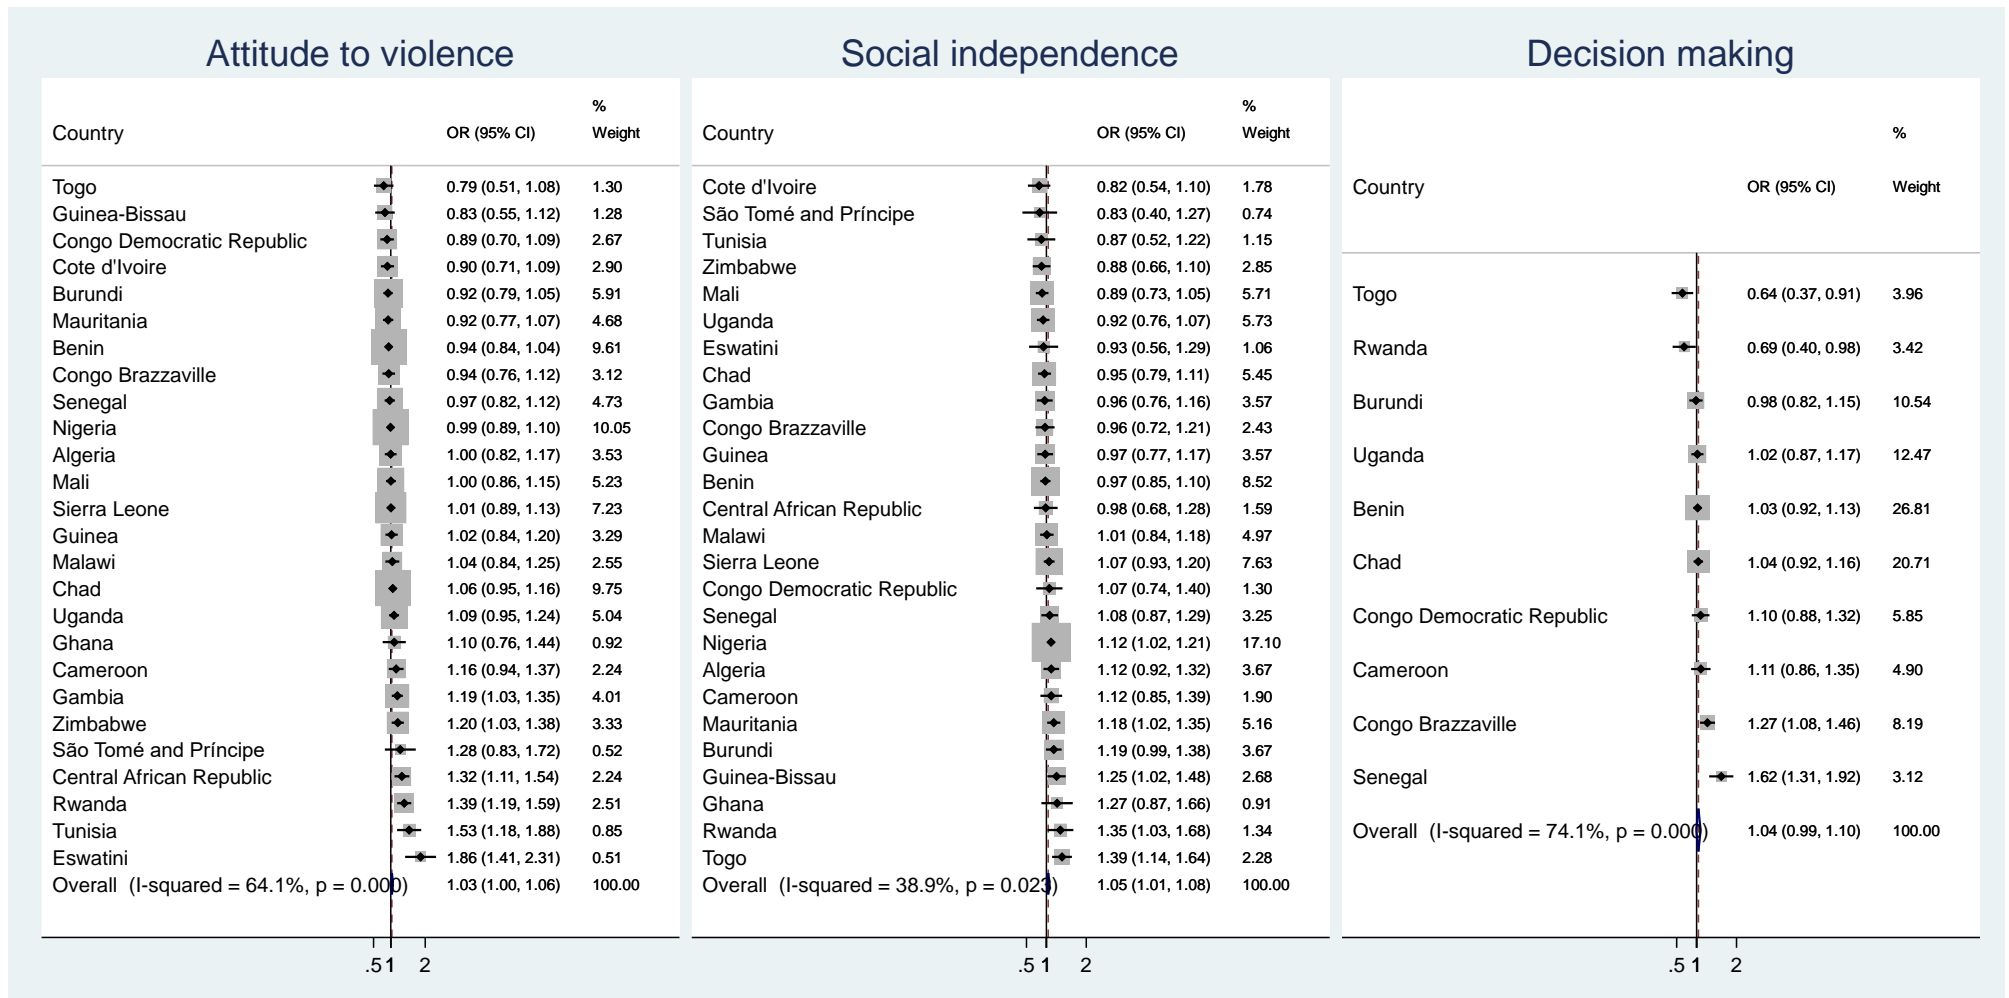

Note: Complete cases are all women with complete information on the 15 items that compose the SWPER Index; imputed cases are the ones with at least one missing item.

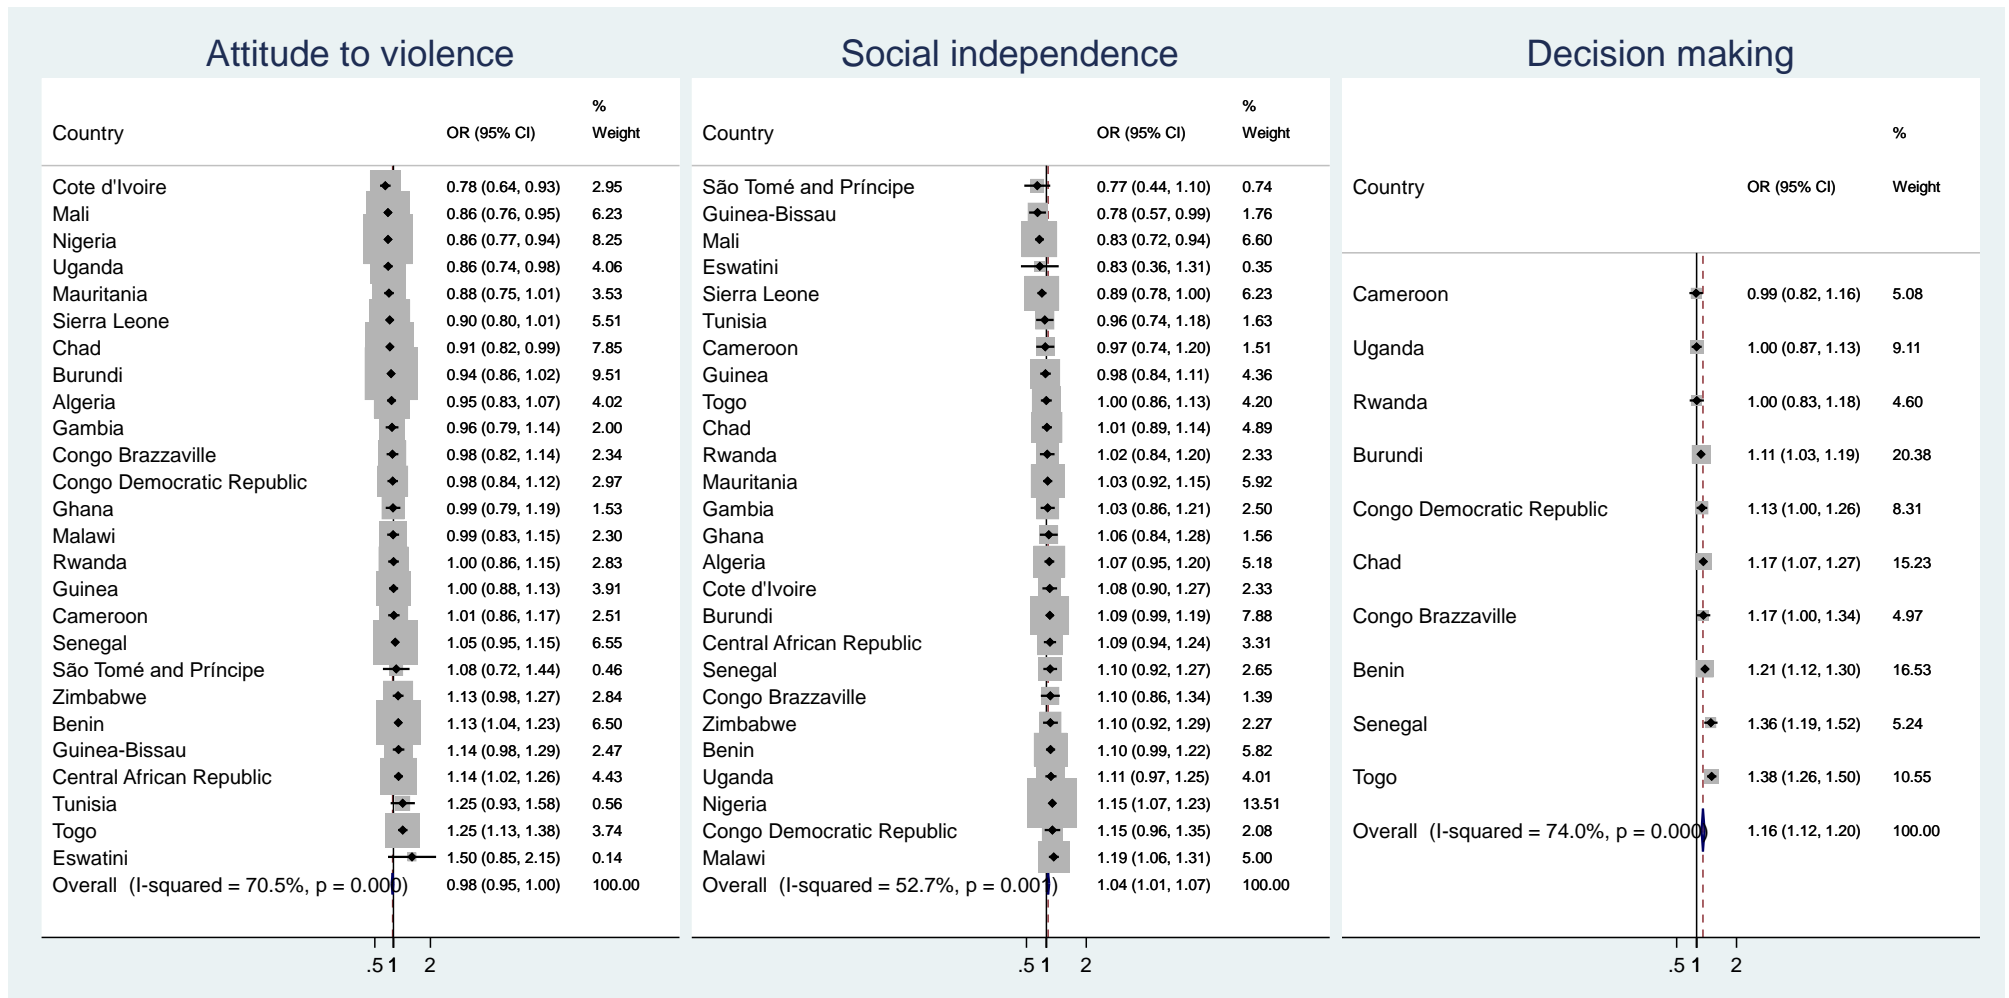

**Figure S2. Association between literacy-numeracy development of the child and the mother's empowerment level for each SWPER global domain. Coefficients are the odds ratios (OR) for a standard deviation increase in the SWPER global score adjusted for wealth.**

**Figure S3. Association between *physical* development of the child and the mother's empowerment level for each SWPER global domain. Coefficients are the odds ratios (OR) for a standard deviation increase in the SWPER global score adjusted for wealth.**

**Figure S4. Association between *learning* development of the child and the mother's empowerment level for each SWPER global domain. Coefficients are the odds ratios (OR) for a standard deviation increase in the SWPER global score adjusted for wealth.**

**Figure S5. Association between socio-emotional development of the child and the mother's empowerment level for each SWPER global domain. Coefficients are the odds ratios (OR) for a standard deviation increase in the SWPER global score adjusted for wealth.**

**Figure S6. Association between the composite *early childhood development index* and the mother's empowerment level for each SWPER global domain. Coefficients are the crude odds ratios (OR) for a standard deviation increase in the SWPER global score.**

**Figure S7. Association between the composite *early childhood development index* and the mother's empowerment level for each SWPER global domain. Coefficients are the odds ratios (OR) for a standard deviation increase in the SWPER global score adjusted for wealth.**
